

# Universal Design Innovation for Heritage

## SABHI: Samaan Access to Built Heritage in India

### About the Project: (Including salient features of the project)

- The aim of this DIC theme is to develop a body of knowledge and products to improve accessibility for persons with functional limitations in heritage sites.
- The processes include engaging multidisciplinary students and stakeholders at every step of product development, for academic enrichment, industry connect and real life application.

### Intent of the Project

- Develop an 'Access Audit Tool-kit' to map environmental barriers in heritage sites.
- To develop a 'Mobile App' to provide information regarding accessibility to the visitors/users at heritage sites.

### Chain of accessibility in heritage sites

### SABHI Mobile App for persons with disabilities and elderly
